

## Nyxus Bird Series

### Camera Accessories

The various models of the **Nyxus Bird** camera series with their stable, water- and dust-proof housings have proven themselves as multifunctional surveillance tools for border control programmes in Europe and North Africa. One of the reasons for this, in addition to the technical potential of these infrared imagers, is the comprehensive range of high-quality accessories.

All accessory components are specially designed for the corresponding model and its applications. This allows users to flexibly customise their camera to their specific requirements. Moreover it opens the possibility to expand the equipment if necessary and thus respond optimally to changing conditions in daily use. All orders are subject to terms and conditions of InfraTec.
