InfraTec GmbH Infrarotsensorik und Messtechnik

Dresden, 25/02/2020

More Service for Customers in North America

InfraTec sales team strengthened by infrared technology expert

Given the widespread success of its pyroelectric detectors in the USA, Canada and Mexico, InfraTec is expanding its local presence. Justin Jensen will be joining the team as new Sales Manager East. "His experience and profound knowledge of the market make Justin Jensen an excellent fit for us," says Dr. Matthias Heinze, Managing Director and responsible for the infrared sensor division. "He has worked in this industry for several years and is very familiar with sales and development. This is exactly the kind of expertise that this job requires."

Jensen will focus on direct support for customers east of the Mississippi in the USA and Canada. Here the chemical engineer will benefit from his many years of professional experience in the field of infrared components, in designing and manufacturing pyroelectric materials as well as in managing OEM customer projects.

InfraTec infrared LLC, a subsidiary of InfraTec GmbH in the USA, founded in 2007, will thus again be strengthened in personnel terms. Application specialist Benjamin Du remains responsible for the sales activities in the western parts of North America. With its new staff members, InfraTec will be able to react even faster and more targeted to customer requests from all over North America.

About InfraTec

The InfraTec infrared sensor and measuring technology company was founded in 1991 and has its headquarters in Dresden, Germany. The privately held company employs more than 230 employees and has its own design, manufacturing and distribution capabilities.

Spectrally single and multi channel infrared detectors count among the products of the infrared sensor division, next to Infrared sensors with electrically tunable filters based on MOEMS. These detectors can be used in gas analysis, fire and flame sensor technology and spectroscopy.

With its infrared measurement technology division, InfraTec is one of the leading suppliers of commercial thermal imaging technology. In addition to the high-end camera series ImageIR® and the VarioCAM® High Definition series, InfraTec offers turnkey thermographic automation solutions.
